DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 16-27 and 34-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Kolls (US006615183B1).
3. Kolls teaches (independent claims 16, 22, 34, 35 and 36, and dependent claims 17 and 23) an image forming and information processing apparatus, and a banner advertisement method, the image forming apparatus comprising:

a communications mechanism (*system 500*, col. 13 lines 19-25) configured to communicate with a banner advertiser terminal (a second *system 500*, col. 33 lines 63-65 and col. 13 lines 25-26) via a network (*network 600*, col. 13 lines 24-25);

a displaying mechanism (a *system 500* with *display means 580*, col. 33 lines 63-65, col. 15 lines 1-3, col. 6 line 63 to col. 7 line 20 and Fig. 3 and 3A) configured to display a banner advertisement, received from the banner advertisement terminal (the second *system 500*), offering at least one of a product and services; and

a response sending mechanism configured to send to the banner advertiser terminal, through the communications mechanism, at least one of an order and an inquiry for the at least one of the product and the services offered by the banner advertisement displayed on the displaying mechanism (col. 7 lines 6-20).

For claims 17, 23, 34, 35 and 36, Kolls also teaches displaying when the image forming apparatus is in a "non-operative" state (col. 34 lines 39-41).

4. Note on interpretation of claim terms - Unless a term is given a "clear definition" in the specification (MPEP § 2111.01), the examiner is obligated to give claims their broadest reasonable interpretation, in light of the specification, and consistent with the interpretation that those skilled in the art would reach (MPEP § 2111). An inventor may define specific terms used to describe invention, but must do so "with reasonable clarity, deliberateness, and precision" (MPEP § 2111.01.III). A "clear definition" must establish the metes and bounds of the terms. A clear definition must unambiguously establish what is and what is not included. A clear definition is indicated by a section labeled definitions, or by the use of phrases such as "by xxx we mean"; "xxx is defined as"; or "xxx includes, ... but does not include ...". An example does not constitute a "clear definition" beyond the scope of the example.
5. The instant application contains no such clear definition for any of its claim terms, two of which are unclear. Hence, the examiner is required to give these terms their broadest reasonable interpretation. First, "an image forming apparatus" is interpreted as any apparatus which performs any two or more of the functions disclosed at para. [0004] of the published application (US 20040117258A1). That is taught by Kolls at col. 6 lines 63-65. Second, the examiner interprets "ad "registration" (claims 20 and 26) to mean "enrollment", establishing the ad in the server for delivery. This is inherent since Kolls teaches delivery of the ads from the server (*universal server*, col. 13 lines 19-25) to the displaying mechanism, so they must have been "registered" with the server.
6. Kolls also teaches claims 18 and 24 (col. 44 lines 45, where "email" is interpreted as any electronic text communication), claim 19 and 25 (col. 17 lines 50-55, where *transaction receipt* reads on an order return message) and claims 21 and 27 (col. 12 line 49).

Response to Arguments

7. Applicant's arguments filed with an amendment on 18 March 2008 have been fully considered but they are not persuasive.
8. Applicant argues (p. 7 top and p. 8 bottom) that the reference teaches *system 500* communicating with itself, which does not read on the claims. Applicant is not correct. The rejection has been modified to note that the term *system 500* is used as a generic term by

the reference. There can be any number of *system 500* universal servers (Kolls, col. 13 lines 23-26).

9. Applicant argues (p. 7, bottom) that Kolls does not teach displaying and response sending mechanisms at col. 31 lines 43-59. The examiner fails to see the relevance of this material to the rejection. Applicant's argument fails to comply with 37 CFR 1.111(b) because it does distinctly and specifically pointing out the supposed errors in the examiner's action.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
11. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald L. Champagne whose telephone number is 571-272-6717. The examiner can normally be reached from 9:30 AM to 8 PM ET, Monday to Thursday. The examiner can also be contacted by e-mail at donald.champagne@uspto.gov, and *informal* fax communications (i.e., communications not to be made of record) may be sent directly to the examiner at 571-273-6717. The fax phone number for all *formal* matters is 571-273-8300.
13. The examiner's supervisor, James W. Myhre, can be reached on 571-272-6722.
14. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. 15. **AFTER FINAL PRACTICE** – Consistent with MPEP § 706.07(f) and 713.09, prosecution generally ends with the final rejection. Examiner will grant an interview after final only when applicant presents compelling evidence that “disposal or clarification for appeal may be accomplished with only nominal further consideration” (MPEP § 713.09). The burden is on applicant to demonstrate this requirement, preferably in no more than 25 words. Amendments are entered after final only when the amendments will clearly simplify issues, or put the case into condition for allowance, clearly and without additional search or more than nominal consideration.
16. Applicant may have after final arguments considered and amendments entered by filing an RCE.
17. **ABANDONMENT** – If examiner cannot by telephone verify applicant’s intent to continue prosecution, the application is subject to abandonment six months after mailing of the last Office action. The agent, attorney or applicant point of contact is responsible for assuring that the Office has their telephone number. Agents and attorneys may verify their registration information including telephone number at the Office’s web site, www.uspto.gov. At the top of the home page, click on Site Index. Then click on Agent & Attorney Roster in the alphabetic list, and search for your registration by your name or number.
